

Aesculap Surgical Instruments

Aesculap scalpel blades
and disposable scalpels

Only really sharp is really good

You probably still think, a scalpel blade is a scalpel blade.

But that will change today.

We always asked ourselves, is there a better, is there the perfect scalpel blade?

And suddenly there was the idea:

It's the tip that makes the difference!

For **3** good reasons

- 1.** For us scalpel blade tips were simply not sharp enough. The microscope reveals it –there are huge differences and enormous room for improvement
- 2.** More precise and safe operating thanks to sharper scalpel blade tips.
- 3.** Sharper scalpel blade tips prevent the "funnel effect".

Therefore the new
Aesculap Scalpel blades
are really sharp.

Conventional scalpel blades

Funnel effect prior to penetration of the skin complicates the incision.

Aesculap scalpel blades

Clean and easy penetration without funnel effect.

Only really sharp is really good
